

# North American Dispense Systems, Inc.

## 45° Aluminum Air Distributors

The unique modular construction allows you to add additional distributor assemblies and shut-offs if required.

The one-piece aluminum body and mounting bracket allows for easy installation and provides adequate space when changing the air line.

### IMPORTANT SAFETY NOTICE:

NADS recommends whenever CO2 gas is used to dispense draught beer, a minimum of two safety relief valves must be installed in the system, in order to prevent personal injury and/or property damage, should over-pressurization occur.

## Aluminum Air Distributors—One piece
