Compact in size, powerful in performance the Bronco Pump is full featured:

Perfect for parties, picnics, social gatherings and holidays. You can enjoy the delights of real draught beer.

Any Time—Anywhere

A portable party pump system for single valve kegs. This convenient pump system is compact in size and comes complete with a sturdy metal tapping base, high volume air pump, beer tubing and faucet.

- Lever action tapping
- Maximum air volume
- "No Foam" pressure relief button
- Product identification
- "Circle Serve" dispensing
- Handy size and weight
- Easy cleaning

Pressure Release Vent: This serves two purposes. First, it eliminates foaming caused by overpumping. Second, it allows the user to safely relieve pressure from the keg before removing the pump.

Affordable Pricing: The low price of the Bronco Pump attracts new customers to keg beer. This helps boost off-premise sales, and can eliminate lending and renting tapping equipment.

Easy Cleaning: The pump can be quickly disassembled for cleaning. The pump body, tubing, and faucet can be immersed and rinsed in plain tap water.
