

SECONDARY REGULATORS 5200 SERIES

Taprite regulators have the highest flow rate in the industry. Robust design delivers performance, reliability and is unlikely to experience freeze up problems. Extremely durable and user friendly polycarbonate bonnets make adjustments a snap! Pull cap to adjust the pressure and push back to lock it in.

The TAPRITE ADVANTAGE

- High CO2 volumetric flow provides continuity in product dispensing
- Primary regulators connect directly to gas source
- Recommended operating pressure should be limited to 2/3 of the gauge range for maximum accuracy
- UL approved per UL252 class IV rating for CO2
- Polycarbonate bonnet will not chip, break or fade
- 10 Micron filter built in to keep contaminants out of regulator
- One repair kit for primary and secondary
- Used primarily for Soda but can be used for other applications.
