

Taprite Ambient Towers

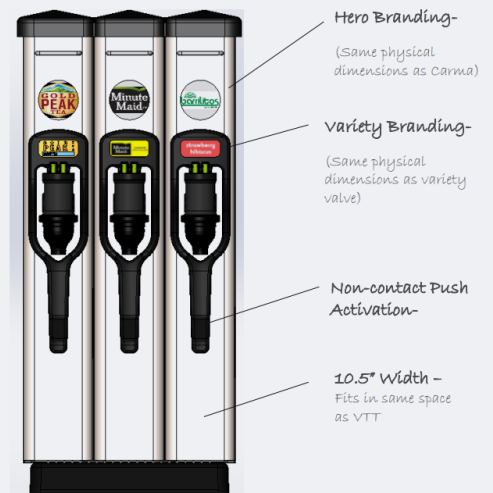

Innovation by Design

- The advanced contactless / push-to-pour valves allow easy pour without touching unit
- Built with Taprite's industry leading advanced ratio and flow control valves
- Superior reliability in a new slim format that is easy to install and service
- Multiple branding points clearly identify all brands with identification windows and on-valve graphics.
- Stainless-steel construction makes them durable, attractive and easy to clean
- State of the art reliability and robust design with few moving parts
- Shipped with drip tray, fittings and ready for installation
- Made in San Antonio, TX, USA

Taprite Ambient Towers

- The Taprite ambient tower is a non-electric dispenser designed for use with bag-in-box or fresh brewed tea concentrate.
- Perfect for individual specialty beverage applications such as adding non-carbonated iced tea, lemonade, cold brewed coffee or other new age beverages to existing fountain system.
- New non-contact / push-to-pour dispensing towers allow easy addition of non-carb fountain beverages and tea to limited-space applications.
- Available in 2, 3, and 4 Valve configurations

2-Valve | Part# 9250036

3-Valve | Part# 9250035

4-Valve | Part# 9250037
