STEM/PLUNGER ASSY, FLANGED

Part Number 265-0483, Stem/Plunger Assembly has been revised. This was implemented as a running change for all barguns and service parts. The part number remains the same and the new design is fully backward and forward compatible with Rattler, ICON, Magnum and Recirculating barguns.

There are two distinguishing cosmetic features resulting from this change. First, the red colorant has been removed from the material. Second, there is a collar at the base of the stem, see photos below.

Please note, this change was phased into production in February beginning with serial number PBD 170220-001. Until such a time inventory is fully depleted some orders might consist of either design, but they will not be intermixed within an individual handle to avoid confusion.
